Global Stocktake in the Paris Agreement

Paris Agreement Goals

Mitigation

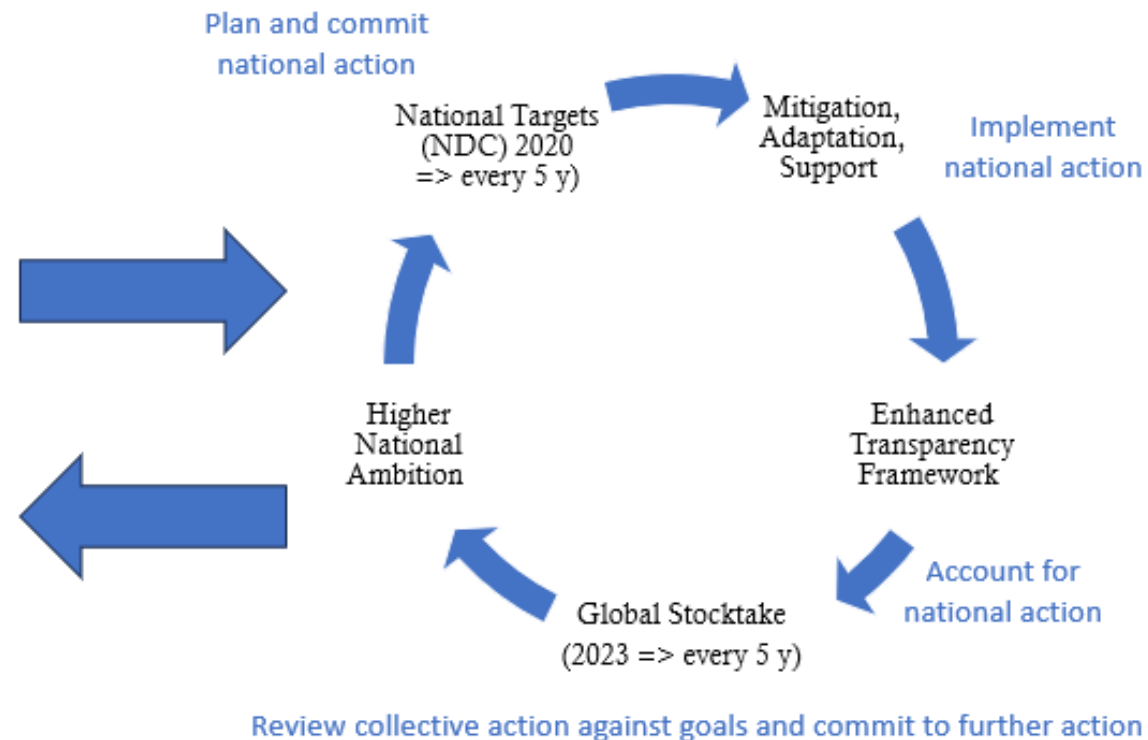

keep temperature increase to well below +2 /1.5 degrees C

Adaptation

increase the ability to adapt and foster resilience

Finance flows consistent with path to low GHG emissions and resilient development

Ambition Cycle

2023: some progress, but not enough: implementation and ambition gap

Outcome of the first Global Stocktake

GST Decision text 1/CMA 5

Collective progress and informing action and support

Mitigation: Keep 1.5° in reach, Urgent deep GHG emissions reduction, Transitioning away from fossil fuels, Tripling renewable energy, doubling energy efficiency, Halting deforestation and forest degradation, Encourage economy wide NDCs

Adaptation: Incremental, multisectoral and transformational actions, universal Early Warning Systems, adaptation targets to reach global goal on adaptation, Enhance national adaptation plans and adaptation communications

MOI: Scaling up mobilization, \$100bn commitment, doubling adaptation finance, support NDCs, Technology Implementation Programme, Capacity building support

Avert and minimize loss and damage, Data management

Advances Just transition and consideration of response measures

International cooperation

Guidance and way forward

- Dialogues on GST, support, Mountains and Children
- Revised NDC and LT-LEDS
- UN SG Event
- Communicating BTRs
- Mainstreaming GST Outcomes

Crosscutting: urgency for action, equity and best available science, sustainable development

What's next?

At national and local level

- **Enhancing climate action:** “Calls on Parties to meaningfully engage Indigenous Peoples and local communities in their climate policies and action” (para 116)

Under the UNFCCC process

- **Mandated events** on mountains, children, annual GST dialogue and UAE dialogue on implementing GST outcome
- **Negotiations** on refining procedural and logistical elements of the Global stocktake, including engagement of stakeholders

Advancing the GGA and Contributing to the GST Process, Ongoing Efforts and Future Directions

Advancing the Global Goal on Adaptation

UAE Framework for Global Climate Resilience

The UAE Framework for Global Climate Resilience guides the achievement of **Global Goal on Adaptation (GGA)** and reviews the overall progress in adapting to climate change. It presents a comprehensive approach to **enhance adaptive capacity, strengthen resilience & reduce vulnerability** to climate change.

KEY ASPECTS OF THE FRAMEWORK

Focuses on **well-being of people, protection of livelihoods, economies, & nature preservation and regeneration**

Adaptation efforts should be **country-driven, voluntary, and tailored to national circumstances.**

Highlights importance of **scaling up of adaptation finance & making it timely & predictable**

Emphasizes on the importance of **early warning systems** to strengthen of adaptation action

Forms a **two-year work programme** to develop indicators to measure progress

Emphasizes the need to examine **transformational adaptation** at different scales and sectors

KEY SECTORS PRIORITIZED IN THE FRAMEWORK

WATER & SANITATION

Reducing **climate-induced water scarcity** & attaining climate-resilient **water supply & sanitation and access to safe & affordable potable water for all**

FOOD & AGRICULTURE

Enhancing climate resilient **food and ag production, supply & distribution and equitable access to adequate food and nutrition for all**

HEALTH

Attaining **health resilience** against climate change and promoting **climate-resilient health services & reducing climate-related morbidity**

ECOSYSTEMS

Accelerating **ecosystem based adaptation and nature-based solutions**

INFRASTRUCTURES

Building climate resilient **infrastructures and human settlements to ensure essential services for all**

LIVELIHOODS

Reducing climate impacts on **poverty eradication & livelihoods, and promoting adaptive social protection**

CULTURAL HERITAGE

Protecting **cultural heritage** from climate-related risks guided by traditional, Indigenous Peoples and local knowledge

TARGETS FOR ITERATIVE ADAPTATION CYCLE

The framework details a series of targets linked to different stages of the adaptation policy cycle

By **2030**, calls the parties to

IMPACT, VULNERABILITY & RISK ASSESSMENT

Conduct up-to-date assessments on climate hazards, impacts & exposure to risks & vulnerabilities

PLANNING

Put in place country-driven, gender responsive NAPs, policy instruments and mainstreamed adaptation planning processes

IMPLEMENTATION

Progress in implementing NAP policies, strategies & reduce impacts of climate hazards

MONITORING, EVALUATION, LEARNING

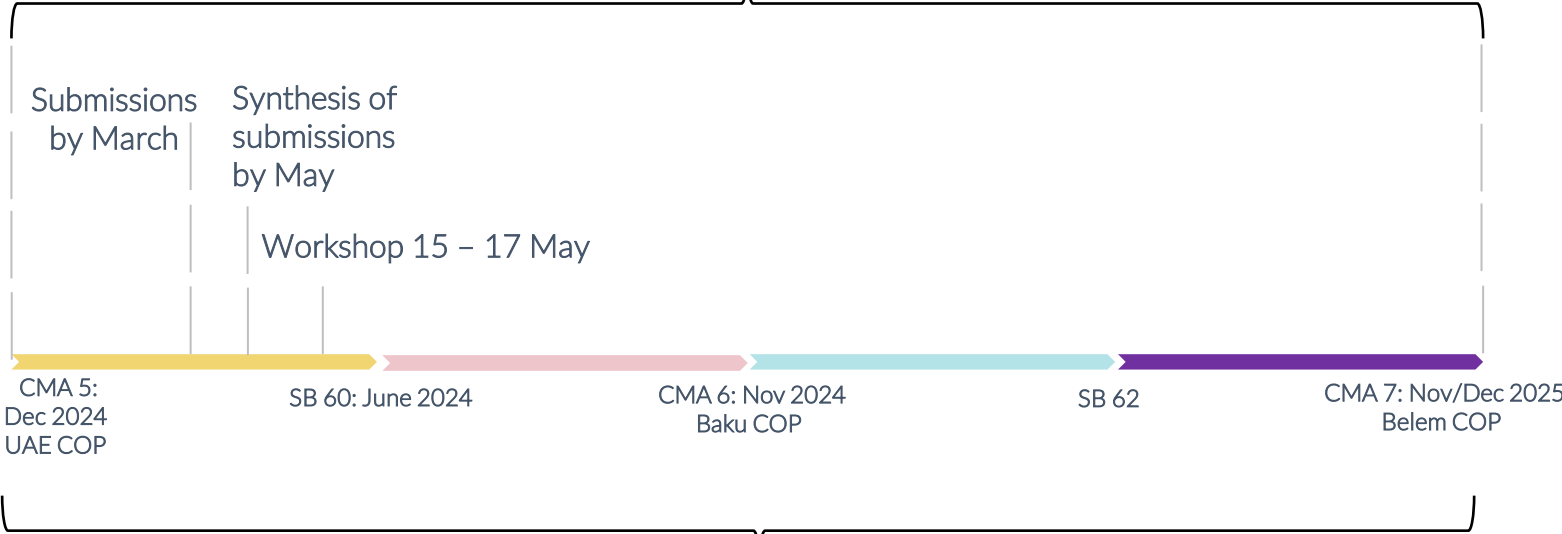

Design & operationalize a system for monitoring, evaluation & learning

Ongoing efforts and future directions

A two-year **UAE – Belém work programme on indicators** for measuring progress achieved towards the targets of the UAE Framework for Global Climate Resilience to identify and, as needed, develop indicators and potential quantified elements for those targets

Adoption of UAE Framework for Global Climate Resilience with 11 targets

New agenda item for consideration of matters relating to the global goal on adaptation
