LCIPP Curricula Roundtable at COP 29

Indigenous Curricula and Educational Materials for Transformational Climate Action

Date, Time and Venue

0

13 November 2024

13:00 -15:00 Azerbaijan Time (AZT)

Venue:

Baku, Azerbaijan

Interpretation available in the UN languages English, Spanish, Russian, French

Draft Concept Note

Background

Indigenous Peoples have long held profound respect for Nature, recognizing the interconnectedness of all things. Indigenous knowledge systems, cultivated over generations through careful observation and interaction with the land and water, offer invaluable insights into environmental stewardship and transformational climate action.

As 2023 stands as the hottest year on record,¹ with extreme weather events devastating communities worldwide, incorporating the values, worldviews, and knowledge of Indigenous Peoples into education systems becomes imperative for transformational climate action and ensuring the long-term resilience of all.

Despite the richness of Indigenous knowledge systems, there is ample room for mainstream education systems to incorporate the knowledge systems of Indigenous Peoples further. For generations, Indigenous knowledge has been transmitted through oral traditions, storytelling, community engagement, mentorship, and cultural rituals. However, climate change and marginalization threaten these knowledge systems, jeopardizing their ethical and equitable incorporation into formal and informal education systems at all levels.

This roundtable dialogue, as part of the work under the Local Communities and Indigenous Peoples Platform (LCIPP), UNFCCC, seeks to facilitate the exchange of experiences and expertise in developing Indigenous curricula and materials related to climate change in formal and informal education systems. The dialogue will also focus on the ethical and equitable use of such materials.

Objectives

The objectives of this round-table dialogue include:

Highlight Indigenous Curricula and Education Materials

 Showcase curricula and education materials developed by Indigenous Peoples for holistically addressing climate change

Promote Equitable Engagement

 Foster a shared understanding of ethical and equitable use of Indigenous curricula and materials in formal and informal education systems

Foster Meaningful Collaborations

 Facilitate interactive dialogue between Indigenous educators, climate policymakers, academic institutions, UN agencies, and other relevant entities to strengthen cocreating and transmitting curricula and education materials to enrich and transform climate actions.

Expected Outcomes

o Enhanced Understanding

Deepen collective understanding of Indigenous knowledge systems and their critical role in addressing climate change

Documentation of Current Practices

Identify and disseminate existing practices of developing and using Indigenous curricula and materials in formal and informal education systems

Guidelines

Facilitate exchange of guidelines for the ethical and equitable use of Indigenous curricula and materials

Policy Recommendations

Develop a clear set of recommendations for climate policymaker and educators to incorporate the values, worldviews, and knowledge of Indigenous Peoples into education systems.

Target Audience

- Indigenous Knowledge Holders
- Representatives from Local Communities
- Education Ministers and Party representatives
- o Educators and Curriculum Developers
- o Representatives of educational institutions and universities
- o International Organizations and UN agencies, including FAO, UNESCO, and CBD
- o NGOs focused on Indigenous rights and education
- Researchers and Academics

Agenda

Indigenous Curriculum and Education Materials for Transformational Climate Action

13:00 -13:30

Opening

Indigenous Invocation (TBD)

Welcome remarks by Co-leads, Facilitative Working Group of the LCIPP (TBC)

Setting the Scene

Representatives from the Facilitative Working Group (FWG) will provide a brief overview to set the context for this important dialogue on Indigenous curricula and educational materials for transformational climate action. Following this, knowledge holders from the seven United Nations Indigenous sociocultural regions will participate in an interactive discussion. The dialogue will focus on current practices for weaving Indigenous Peoples' knowledge into education systems, exploring guidelines for the ethical and equitable use of such materials, and offering recommendations on how to further enhance the engagement of Indigenous knowledge in education to drive transformational climate action. This interactive dialogue will be followed by reflections from Ministers of Education and Party representatives.

- FWG Representatives
- Knowledge Holders-
 - Ivan Vaalboii (Africa)
 - Priscilla Settee (North America)
 - Mrinal Kanti Tripura (Asia)
 - Andrei Issakov (Central and Eastern Europe, Russian Federation, Central Asia, and Transcaucasia)
 - Anna Nuariki (Pacific)
- Education Ministers (TBC)

13:30 -14:30

Thematic Group Discussions

The group discussions will follow a rotating table format, with 20 minutes allocated per table. Participants will divide into smaller groups to explore the following specific topics:

- Examples of Indigenous curricula related to climate change
- Ethical and equitable use of Indigenous curricula and materials in educational systems
- Recommendations for strengthening the incorporation of Indigenous curricula and materials in education to drive transformational climate action

14:30 -14:50

Plenary Session

Knowledge holders from the seven UN Indigenous sociocultural regions will be invited to serve as facilitators and rapporteurs for the rotating table discussions. Following the discussions, they will return to the plenary to share three key takeaways from their respective tables.

- Report back from the small group discussions
- Interactive Q&A

14:50 -15:00

Closing Remarks

FWG Activity Co-leads

Indigenous Invocation (TBD)
